

## Scratch Week 2023

# Monday, May 8th: Journey Around the World

During Scratch Week, we invite you to imagine, create, and share along with us in the Scratch online community by participating in our featured studios. Learn more about Scratch Week here [https://resources.scratch.mit.edu/www/events/en/ScratchLearningResource\\_ScratchWeek2023.pdf](https://resources.scratch.mit.edu/www/events/en/ScratchLearningResource_ScratchWeek2023.pdf)

**This studio theme will be revealed for all users in a teaser project released on May 1st**, but is available early for educators for your own planning. **Please keep this theme top secret**, so that we do not spoil the magic for young people in the online community ahead of Scratch Week.

## Studio Description

Happy first day of Scratch Week, everyone! To kick start the week, Scratch Cat is going on a global journey to celebrate, and you're invited!

Have you ever dreamt of traveling the globe, discovering new places, and experiencing diverse cultures? Want to join in on the traveling journey with Scratchers around the globe? Perhaps you want to welcome Scratch Cat and friends in visiting your own local part of the world? Then this is the place for you! Pack your virtual bags and join in, as Scratch Cat takes a journey around the world.

Looking for ideas to get started?

- Create an animation of you and Scratch Cat visiting famous landmarks like the Eiffel Tower, the Great Wall of China, or the Pyramids of Egypt
- Design a game where you explore a city or region and collect local souvenirs
- Make a virtual passport of all the places you have visited or would like to visit in the future
- Create a tutorial on how to make traditional dishes from your country or region, with Scratch Cat as your assistant chef
- Imagine Scratch Cat can communicate in every language and create a story about it
- Create an interactive travel guide or brochure for Scratch Cat to use

Remember, these are only suggestions. You are welcome to come up with your own ideas as well, or take inspiration from projects already in the studio! Just make sure you don't accidentally reveal any personal information in your project (like the city where you live). What will you create?
